Scientific Roundtable “Digital Challenges in Health Law: From Telemedicine to AI”

The Health Law Group at the Department of Foreign and International Social Law of the Max Planck Institute for Social Law and Social Policy cordially invites you to partake in the scientific roundtable *Digital Challenges in Health Law: From Telemedicine to AI*, which will take place on **17 June 2021 from 9:00 - 13:30 CET**.

Through this event we hope to foster international collaboration between the Centre for Advanced Studies in Biomedical Innovation Law (CeBIL) at the University of Copenhagen, the BioLaw Research Group (BioDiritto) at the University of Trento, and the Max Planck Institute for Social Law and Social Policy. We would like to facilitate an international exchange of existing knowledge and current research, and provide an opportunity to jointly discuss topics of shared concern and interest. Specifically, this workshop is designed to bring junior and senior scholars together to discuss their work on health law topics, and provide a platform for constructive feedback from a panel of both top academics and peers.

Two scholars (PhDs and/or Post-docs) from each institution will each have 30 minute timeslots to formally present their research and field questions. We invite all those attending to engage in the Q&A and discussion, and specifically ask senior scholars in attendance to provide feedback.

For any further information and questions please do not hesitate to contact us (tonti@mpisoc.mpg.de).
